

**CS5610 Web Development Project 1**  
Personal Homepage

## Project Objective

To build a personal homepage which illustrates personal and professional information about self. This is a project for CS5610 Web Development class at Northeastern University. The motivation behind this project is to showcase about ourselves by making the use of creativity and learning of HTML5, CSS3 and JavaScript. The website demonstrates about self that is skills, education, background and projects. The project also allows us to get familiar with eslint and prettier. The website is [W3C Compliant](#) and shows the use of HTML/CSS and JavaScript together.

## User Personas

- Hiring manager/ recruiter looking at candidate profile
- Students and designers looking for design inspiration
- Small scale business owners looking for freelance web developers
- Companies hiring for web developers/ frontend developers
- Students and faculty at Northeastern university
